

# multi-room tv

Watch different programs on multiple TVs...at the same time! We can do it for you with technology from ChannelPlus®. Ask about multi-room TV for your home.

## MODULATORS MAKE LIFE EASIER

If you're anything like the average American, you already own several TVs, multiple DVD players and a couple of receivers. The challenge comes in how to get this signal there and that signal here while still making everyone in the house happy. Behold, the multi-channel video modulator. Read on...

\*Diagram shown using ChannelPlus 3025 configuration. Your set-up may be different depending on modulator purchased and your equipment.

### MULTI-ROOM TV FAQ

Just how do modulators work?

Multi-channel video modulators have multiple audio and video inputs and one RF output. A/V outputs on a DVD player, VCR or satellite receiver are connected to the A/V inputs on the modulator. The modulator is then programmed to broadcast the signals on a certain frequency. That RF broadcast is then received by the connected TV. When the TV is tuned to the programmed channel, the A/V signal of the source device is accessed. For example, the DBS satellite system is programmed to broadcast on channel 11. Turn the bedroom TV to channel 11 and you're watching what is being broadcast on the DBS satellite system. Add Emitters and Targets to control the devices, like the DVD player or DBS satellite system, and you're good to go.

The diagram above shows one example of how a modulator can work but everyone's home theater set-up is different. There are many different ChannelPlus® products available. We can find the right set-up for you.

## WATCH YOUR FAVORITES!

He wants to watch sports. She wants to rent a movie. Sound familiar? Easily solve the problem with the ChannelPlus® 3025 modulator. Broadcast different sources (i.e., satellite receiver and DVD player) on television channels that you specify to up to three remote TVs throughout your home. By simply changing the channel on a remote TV, you can choose between DVD, satellite receiver, off-air antenna or other video source.

### CHANNELPLUS 3025 (PICTURED ABOVE)

#3000253 S&H \$18 \$249.95

## WATCH ON FIVE TVs!

Distributes video and audio from two sources such as DVD and a satellite receiver plus from an off-air antenna or cable on up to 5 TVs. Includes IR transmitter/receivers.

### SONY MRD-D1 MODULATOR

#3000035 S&H \$18 \$169.95

## CONTROL FROM ANY ROOM

The ChannelPlus® Target, when used with the ChannelPlus® 3025 and Emitter, makes it possible for an infrared remote to send the signal back to its source, no matter where it is. This allows you to change satellite channels, or control a DVD player from any location in the house.

### CHANNELPLUS - TARGET

#3000249 S&H \$8 \$29.95

### CHANNELPLUS - EMITTER

#3000250 S&H \$8 \$12.95

Skyvision's minimum purchase policy is \$20.00 plus shipping & handling.

# roof antennas

We've selected easy-to-assemble antennas that mount easily and provide good, clear reception, depending on your distance from the signal source

Get the most out of your high definition television when you add an off-air HD antenna to your home theater set-up. There's more HD channels available now than ever before!

HDTV

METRO

## HDTV AND ANALOG ANTENNA SYSTEM

- 16" square VHF/UHF antenna
- Use when the closest TV transmission tower is up to 50 miles away
- Receives and modulates analog and HDTV (digital) signals
- Built-in 12dB UHF/VHF amplifier perfectly suited for HDTV off-air reception
- Works indoors or outdoors
- Mount on walls, roofs, railings, over a satellite dish, on patios or in an attic
- Great for metropolitan areas where line-of-site to transmit source is blocked

### SQUARESHOOTER™ SS-2000 AMPLIFIED UHF/VHF/FM ANTENNA

#1500094 S&H \$16 \$129.95

### SQUARESHOOTER™ SS-1000 UHF/VHF/FM ANTENNA

- Non-amplified
- Use when the closest TV transmission tower is up to 40 miles away

#1500088 S&H \$16 \$99.95

HDTV

## UP TO 45 MILE RANGE VHF/UHF/FM ELIMINATE PICTURE FUZZ

- 30 mile range for UHF—45 mile range for VHF
- Optimized for both HDTV/Digital and analog signals
- Can be used in combination with DBS satellite systems
- Fully assembled and easy to install

### STEALTHENNA VHF/UHF/FM ANTENNA

#6000031 S&H \$19 \$59.95

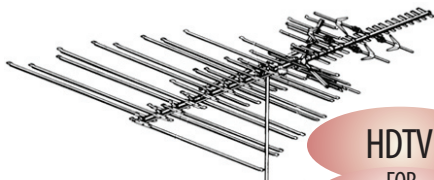

HDTV

## REMOTE CONTROLLED UHF/VHF HDTV

- Up to 30 mile range
- Convenient 360° all-direction rotation
- High sensitivity reception
- Built-in high gain booster
- Indoor IR remote control
- High quality far ranging reception
- Built-in super low noise front amplifier

### UHF/VHF/HDTV REMOTE CONTROLLED ANTENNA

#1500082 S&H \$12 \$59.95

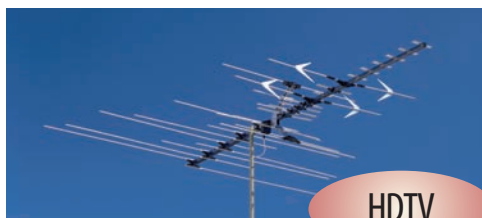

HDTV  
FOR  
DEEPFRINGE  
AREAS

## LOCAL HDTV RECEPTION FOR THE NOT-SO-LOCAL

- Up to 100 mile range
- 69 elements (35 UHF and 34 VHF)
- Maximum width 110"
- Great for off-air HDTV reception
- 101" turning radius
- Engineered for extra strength

### HD-8200 DEEP FRINGE ANTENNA

#1531010 S&H \$36 \$199.95

HDTV  
FOR  
DEEPFRINGE  
AREAS

## WHEN "LOCAL" TV IS UP TO 80 MILES AWAY

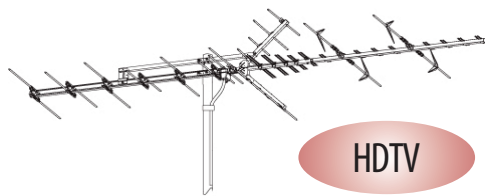

- Up to 80 mile range
- 68 elements (40 UHF and 28 VHF)
- Maximum width 110"
- Great for off-air HDTV reception

### HD-7084P DEEP FRINGE ANTENNA

#1531015 S&H \$36 \$179.95

# roof antennas

There are more HD channels available now than ever before. There's never been a better time to receive local HD off-air channels.

HDTV

## WHEN "LOCAL" TV IS UP TO 60 MILES AWAY

- Up to 60 mile range
- Optimized for channels 7-69
- 1-2 dB higher gain on VHF and UHF, important for weak signal areas
- 53 elements (30 UHF and 23 VHF)
- 75 ohm downlead coupler simply snaps into place for fast, easy assembly
- Boom length: 131.25" Turning radius: 81.1"

### HD7697P UHF/VHF/HD ANTENNA

#1531016 S&H \$36 \$169.95

## STOP SUBSCRIBING TO LOCALS

HDTV

METRO

- Mounts to DISH 500 or elliptical DBS multiple LNB satellite dish (Phase 3)
- Combines signals, eliminating the need to run additional cables. Works with up to four receivers
- Use when the closest TV transmission tower is up to 15 miles away
- HDTV ready—receive high def broadcasts aired on your local stations

### AMPLIFIED CLIP-ON DBS OUTDOOR ANTENNA

#1500090 S&H \$11 \$69.95

## WHEN "LOCAL" TV IS UP TO 45 MILES AWAY

SUBURBAN

- Provides excellent reception of local programming
- Outstanding UHF/VHF reception for channels 2-83
- Three staggered bay rotatable dipole antennas
- Easy-to-follow directions and detailed diagrams
- Mount on roof for best reception
- Includes guy wire and mounting hardware

### PERFECTVISION® ANTENNA

#1500029 S&H \$18 \$59.95

## EASY TO INSTALL UHF HD ANTENNA DELIVERS GREAT RECEPTION

- Wideband UHF digital TV antenna
- Easy installation
- Bandwidth 470-862 MHz
- Mast clamp (Max 60 mm diameter)
- Assembles without tools
- Double reflector
- Dipole with F connector
- 17 dBi maximum gain

### HD-4400 4-BAY UHF ANTENNA

#1531017 S&H \$12 \$35.95

## DIGITAL TO ANALOG CONVERTER BOX

This Digital to Analog TV Converter Box connects to your current analog TV to receive and display over-the-air digital broadcasts. Includes Electronic Program Guide function with up to 7-day on-screen listing of TV program information. V-chip Parental Control features helps parents manage children's television viewing by rating categories. Automatically searches for broadcast channels 2-69 and works with your existing VHF/UHF or HDTV antenna to deliver better picture and sound quality. 7.17" x 4.65" x 1.42".

### ATVC201 DIGITAL TO ANALOG CONVERTER BOX

#1500108 S&H \$11 \$49.95

# roof antenna accessories

We offer a variety of roof antenna accessories designed to give do-it-yourself projects a professional finish.

## ADD OOMPH TO YOUR ANTENNA

This mast-mounted outdoor amplifier gives your off-air antenna the boost it needs for great reception. 68 off-air channel range (54-806 MHz), suitable for small to large MATV-SMATV systems. Provides clearer reception and low harmonic distortion. Weather-protected connections and a 75Ω F-type input and output interface for optimum connection. Maximum input 30 dBmV/VHF and 25 dBmV/UHF. Includes mounting hardware.

### HD PRE-AMPLIFIER

#3020006 S&H \$8 \$89.95

## DIPLEXER

Combines and splits the signal from an off-air antenna and a satellite signal.

#3000039 S&H \* \$16.95

"Thanks for the quick response. One of the main reasons I contacted Skyvision is that your Techs have been SO GREAT over the years!"

Art—Chula, GA

## COMBINE SIGNALS INTO ONE COAX

This voltage regulated diplexer accommodates a dual LNBF and an amplified off-air antenna, combining both the satellite and off-air antenna into a single coax cable. Perfect for a two-receiver home installation. The voltage regulated power passing capability ensures a continuous 12 volt DC power supply to the off-air antenna pre-amp. DIRECTV compatible.

### DP-3020 DUAL VOLTAGE REGULATED DIPLEXER

#3031001 S&H \$8 \$24.95

Problems with your FM signal? If you're seeing a herringbone pattern on VHF channels, chances are the antenna is receiving too much FM signal. An FM trap will alleviate this problem.

Skyvision's minimum purchase policy is \$20.00 plus shipping & handling. \*One \$8.00 S&H charge applies to up to four assorted items (2 pack, 20 pack, etc.) on this page if marked with "S&H \*\*". Shipping and handling reduced on multiple purchases. \*\*Shipped via truck freight only. Call for quote.

## A MUST FOR FRINGE AND DEEP-FRINGE ANTENNAS

This heavy duty rotator with IR universal remote control includes 69-channel, pre-programmable memory protected in the event of a power failure. The console's front panel displays current channel.

# roof antenna accessories

Stop paying for local HDTV channels when you add an HDTV tuner to your existing HDTV-ready television or DTV-capable computer monitor.

## GETTING FREE OFF-AIR HDTV

The three main methods of receiving free off-air High Definition digital signals are:

1. HDTV Over The Air Tuners (also known as an ATSC tuner). These tuners offer the greatest flexibility as technology changes. Pair this type of tuner with your HDTV-ready off-air antenna (see page 40-41) and HD-ready television.
2. TV Set with Built-In HDTV Tuner: Many high definition TVs have a digital or ATSC tuner built right into the set and add an HDTV-ready off-air antenna. Note: Televisions marked HD-Ready means you will still need to purchase a tuner.
3. HD Satellite Tuner: Satellites companies offer HD satellite tuners with an over-the-air tuner built in. Add an over-the-air antenna and these tuners are perfect for receiving local HDTV programming.

### What are the benefits of HDTV Off-Air Antennas?

**Picture Quality:** Off-air antennas are the only way to receive HDTV in the resolution that the network intended it to be broadcast. There is no bandwidth limitations so there is no compression.

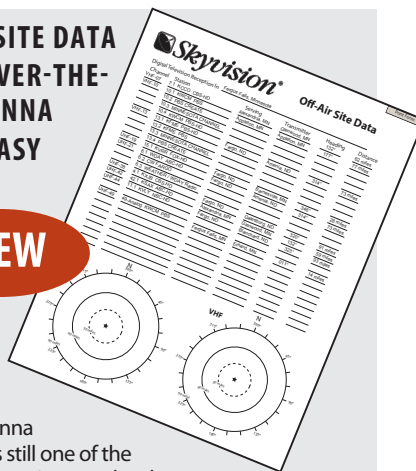

**Low Cost:** There is never a fee for local off-air channels. Other than the cost of equipment, receiving HDTV off-air signals is free.

An antenna rotator is the perfect solution if the UHF stations you want to receive are located in different directions from the house (more than 30 degrees apart).

## OFF-AIR SITE DATA MAKES OVER-THE-AIR ANTENNA SET-UP EASY

**NEW**

Off-air antenna reception is still one of the best ways to enjoy your local digital programs—and it's FREE! Let Skyvision take the hassle out of setting up an off-air antenna and help you locate all the digital channels available in your area with custom over-the-air (OTA) site coordinates. What would normally take hours and hours of research will be customized specifically for you and your location. It will help you determine how far you are from the transmitters, what stations are available in your area, what direction the transmitters are from your location and the directions for each station within a typical 90 mile radius. We also include a variety of easy to follow off-air configurations to assist you in setting up an off-air antenna and other accessories such as preamplifiers and rotors. This invaluable tool takes the guesswork out of finding digital channels in your area.
